

Aircraft financing tailor-made.

Mobility without limits with SüdLeasing.

Full steam ahead with SüdLeasing.

Speed and mobility are two of the key factors of the success of companies – and nothing represents these factors better than aeroplanes.

Just take off, when and wherever you like. SüdLeasing makes your dreams of flying come true. Our experienced Aviation Expertise Centre will manage the financing of your desired aircraft, offering an attractive alternative to purchasing. Through our international business contacts, we are your contact partner for the acquisition of:

- Business jets
- Small planes
- Helicopters

Strong impetus: growing globalisation increases the demand for business flights.

Whether leasing or hire purchase: you will make a flying start with our experts and can be sure of a soft landing, because we know the market and enjoy global contacts with different manufacturers.

Our sector know-how enables us to estimate the value pattern of each aeroplane or an entire fleet of aircraft very precisely; and we can discuss post-run time ideas with you: whether you decide to keep the object, continue to use it or return it to us. As our customer, you will profit from favourable payment rates.

As a market leader in our sector, we are continually working on the development of optimal hire purchase and leasing models for our customers.

Make a flying start with SüdLeasing. The awareness that it is not the ownership of an asset, but its use that represents its value, has been established among our customers for a long time.

Leasing offers you essential financial advantages. You pay less tax as well as acquire increased economical agility, as you finance the repayments from revenues achieved. You have no exposure to your credit limit at your bank or other restrictive financing conditions for high purchase costs.

Together we analyse possible opportunities and we draft a tailor-made solution for you, a suitable form of contract in the shape of:

- Leasing
- Hire-purchase
- Loan

Our support goes much further than the pure financing of your aeroplane. You can always rely on the experts at SüdLeasing even with regard to the following: international contracts and

registrations, foreign currency financing (variable or fixed rate), tax and toll provisions and criteria or when considering accounting regulations.

Whether you are considering the purchase of a helicopter or aeroplane for your company due to increasing globalisation or you are thinking about offering commercial business flights in private jets, SüdLeasing is your competent partner in financing. Due to high demand, we develop tailor-made financial solutions in a growing market which is becoming even more significant.

At SüdLeasing you will not only find a comprehensive range of leasing options, but also services and additional offers supporting and supplementing the leasing products, such as insurances or our online calculation platform, Partner-Web.

Arrive at all your business locations flexibly, punctually and quickly.

SüdLeasing. From a good family.

We have a clear vision: to offer our customers reliable financial services and being a trustworthy leasing partner for them – today and every day.

SüdLeasing is your partner whenever you need tailor-made financial solutions. As an independent leasing company that is not tied to particular manufacturers, we are one of the top financing companies in Europe.

This success was not achieved overnight. For more than 30 years, we have been consulting and offering flexible leasing models to our customers and business partners. Our fair contracts and our reliable, honest means of settlement have led to continuous growth. In the meantime, SüdLeasing is represented at over 30 national and international locations. As a subsidiary of Landesbank Baden-Württemberg (LBBW), we also have access to the infrastructure of an international commercial bank and one of the largest banks in Germany.

Together with further companies within the group, we form a full range of financial support such as real estate financing, for example, as well as factoring, capital investments, capital shareholdings, project development and construction management.

If you would like to make full use of the advantages of aircraft leasing and also value expert consultation and service, don't hesitate to contact us. Our support will help you find a tailor-made financing concept which will offer you all the advantages of leasing available.

Well set up – as a subsidiary of LBBW SüdLeasing offers you local competence.

Leasing from SüdLeasing. Your advantages at a glance:

- *Increased liquidity*
- *Financing through current revenue*
- *Secure calculation basis*
- *Marketable risk assessment*
- *Tax and duty optimisation*
- *The object to be financed generally suffices as security*
- *No change to balance sheet structure*

 SüdLeasing's philosophy is based on the principles of the modern Bauhaus style.
 Its geometric elements symbolise a
 clearly defined business concept for us. Consequently the shapes circle, triangle and square represent our principles of **innovation, expertise and security.**

Innovative ideas and solutions enable us to offer you the necessary financial scope.

You will experience expertise in our daily cooperation and with experienced personnel consultation.

Our many years of experience, reliability and our business relationship with Landesbank Baden-Württemberg guarantee you the security to function efficiently in a turbulent marketplace.
